

Luca Venezia

.NET Developer

Messina, Italia
3515785652
venezialuca23@gmail.com
02.12.2003

PROFILE

.NET Developer with experience in developing enterprise applications, custom management systems and innovative AI-based solutions. Specialized in the Microsoft ecosystem, with a strong ability to work independently and solve complex problems. Passionate about technology and committed to continuous learning.

WORK EXPERIENCE

Jul 2026 – Present

Contractor, Avanade

- Monitor Microsoft Fabric, handling alerts and tracking the status of pipelines and related resources.
- Analyze and resolve failed pipelines (refresh issues, execution errors, capacity problems) by investigating logs and telemetry.
- Use SQL queries on underlying tables to correct inconsistent data and restore the proper flow of business processes.

Sep 2024 – Present

Innovation Developer, Cloudia Research S.P.A · Messina

- Develop and customize an internal management product in Blazor Server and ASP.NET Core for 2 enterprise clients (including a multi-company setup), delivering 7 live demos on Teams to client end users (10–100 attendees).
- Co-design a Blazor WebAssembly video-collection app for AI4Sign, Microsoft “AI for Inclusion” 2024 winner, enabling users to record training videos for real-time Italian Sign Language models.
- Administer SQL Server databases (stored procedures, views, Agent jobs) and use Entity Framework Core and Dapper across multiple projects.
- Migrate 3 applications from .NET 6 to .NET 8 and manage releases via IIS and Azure DevOps CI/CD using Git (SourceTree).
- Deliver a live tutorial on AI coding tools (e.g. Cursor) to the .NET team (including team lead and area manager), later adopted also by the AI team, and support solutions on Dynamics 365 CRM, Power Pages, Power Apps and Power Automate integrated with Business Central via OData.
- Create a SQL exercise and training slides for the internal new-hire academy, personally presenting one of the topics.

Mar 2024 – Jul 2024

Academy - Junior Consultant, Cloudia Research S.P.A · Messina

- Intensive training on .NET stack, Blazor, SQL, Microsoft Power Platform and Azure.
- Training on business economics, soft skills and presentation techniques.
- Team-based practical exercises on business digitalization with final presentations.

EDUCATION

Sep 2022 – Present

Scienze E Tecnologie Informatiche, Università Degli Studi Di Messina · Messina

- Expected graduation: 2027.
- Key coursework: Relational databases (MySQL), Algorithms and Data Structures (Python), Object-oriented programming (Java, PHP, C), Web development (HTML, CSS, JavaScript), Linux and security lab.

Sep 2017 – Jun 2022

Informatica E Telecomunicazioni, ITIS E. Torricelli · S. Agata Di Militello
